

REBOUND ACE[®]

time to walk on air

Air CUSHION

Internationally recognized as the No. 1 players surface, Rebound Ace[®] is the official Grand Slam surface used at the Australian Open. A high performance system that actually reduces stress on the body, this surface never loses resilience from age or hard wear.

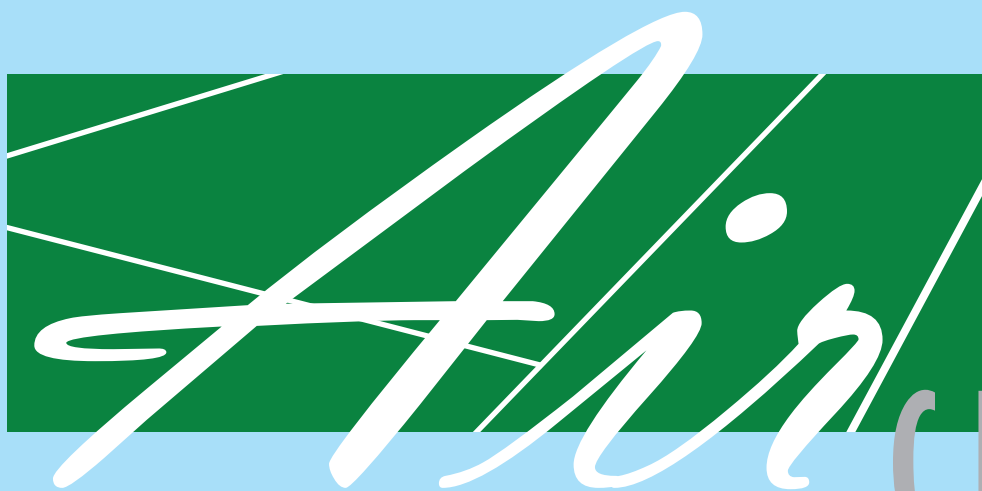

After four years of R&D and extensive field testing, Rebound Ace[®] Sports is proud and excited to introduce the next generation in the Rebound Ace[®] family - The Revolutionary Rebound Ace[®] Air Cushion. This retains all the design, performance and playing properties of the proven, patented Rebound Ace[®] surface, as used at the Australian Open Tennis Tournament and the Sydney 2000 Olympics, as well as providing additional benefits.

The parallel development of a unique Dynamic Cushion Base provides an alternative to expensive asphalt and concrete bases for both new courts and court conversions.

When combined with the Rebound Ace[®] Air Cushion surface, the DCB system provides a very economical high quality cushioned playing surface, ideal for tournament and recreational play as well as good stroke and tactical skills development for junior players.

The *Revolutionary* Sports Surface

Incorporating

a division of

BENEFITS

- A more economical surface.
- Ability to cover old cracked court surfaces.
- Cost reduction by using Dynamic Cushion Base (DCB).
- Ease of conversion from different variety of existing surfaces, eg. clay, indoor carpet, acrylic hardcourts.
- Suitable indoors or outdoors.

Worn Synthetic Grass

Old Concrete/Acrylic

DYNAMIC CUSHION BASE (DCB)

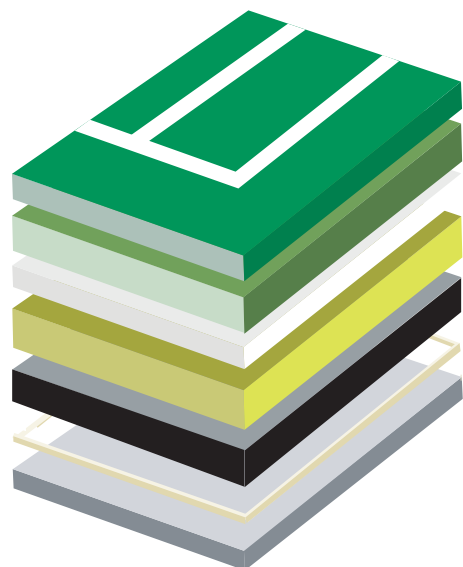

Cracked Asphalt/Hardcourt

Clay

The solution to resurfacing or converting most types of surfaces and substrates

- ← Line Marking
 - ← Playing Surface x 2
